Square enix and its developments over the past 10 years, what a fall from grace.. Do not buy this game. I bought since I like JRPGs but this game is a waste of time.

Bad story and awful writing where very character has to give their input for useless as it is and just bad writing and plot. I still remember a moment where it is a race of time and the world is about to end and the characters just stop everything to talk about how an npc adresses another in an informal way. Like... what?

The gameplay is okay but the mechanics are not utilized. The devs instead of using the placement to create difficulty, just create full team KOs with random mechanics. At the end of the game you are force to have 3 characters and the boss can is like an ff malboro on steroids for some reason. After 10 minuts of fighting he petrifies everyone just because (and if it wasnt petrify it can be some other because the boss just spams all debuffs). Great design.

I bought the game on a sale, but I would at max value this game at 10 euros.
